

“Journal of Science and Technology on Information security”

(Version No. II of the *Information Security Journal*)

Information Security Journal publishes a periodical academic – scientific journal in the field of Information Security with the title "Research of Science and Technology in the field of Information Security". The Publication aims to create a forum for exchange of specialized scientific – technological issues in the field of Information Security, to support the research of science and technology, contributing to connecting research, training and applications deployment.

The Journal is published in Vietnamese and English, issued 2 editions / year in the whole territory of Vietnam, to the leaders, managers, scientific – technical staff, teachers, graduate students, the fellows, ... such people who are conducting the activities in the field of Information Security in the country.

The papers that are published in journal are the scientific research works, applications of new technologies, scientific achievements, new techniques in the field of secrecy and information security, which have not been sent to any magazine to be published or to any conference proceedings and must be of scientific quality, which have been appraised and assessed by the experts in order to be counted points by the State’s scientific Councils for the converted scientific works.
